## Flying Star 2026

	SE	S	SW	
	9	5 	7 	
E	8	1	3 	W
	4	6	2 	
	NE	N	NW	

- Place a metal windchime in the South to offset the challenge of the number five in 2026.
- Hang 6 metal coins in the Northwest to counteract the challenge of number two.
- Place a piece of red paper in the West to weaken the influence of number three.
- Place three bamboo stalks in the Southwest to offset number seven.

Each year specific directions bring with them a challenge. Because these directions follow the flying star layout, the challenge moves accordingly. It is necessary to be cognizant of where the good and the challenging directions will land so you can take precautions.

In the year of the Horse, the “Five Yellow” - symbolizing obstacles and misfortune - arrives at the South. The number 5 is considered the most challenging. It is recommended that one hangs a

metal windchime in the South side of the house to dissolve this bad energy. Reminder: Metal weakens or depletes Earth (5).

Another challenge is the number 2, symbolizing sickness. This number lands in the Northwest in 2026. The traditional method to dissolve this 2 is to hang a string of six metal coins in the affected area in the Northwest of the house. Anything metal will help to weaken this energy (coins, metal vase, etc.). Reminder: Metal weakens Earth (2).

The number 3 sets up conflict and robbery. This year it falls in the West. It is necessary to put a piece of red paper in this position to minimize such bad influence, particularly if there is a door or window in this area which could invite intruders. Reminder: Fire depletes Wood (3).

Finally, the number 7 representing scandals is in the Southwest. The traditional solution is to place a bamboo plant grown in clear glass vase of water in the South-west location. Reminder: Water depletes Metal (7).
